

I am outraged by the National Association of Broadcasters attempt to limit what I may hear in my paid subscribed service of XM Radio. XM provides a continuity of service completely unavailable elsewhere. I can begin a trip on one coast and be updated constantly as to weather and traffic for each waypoint in a trip to the opposite coast, including areas where regular radio is unavailable or spotty. Please reject NAP petition 04-160 and send a clear message to organizations that wish to restrict competition and to further their less than adequate services when compared to real innovaters like XM Radio. Thank you,
Al Smith
Elba, Alabama
[A very happy XM radio customer]
